**“2 BILLION PEOPLE
STILL LACK ACCESS TO
MANAGED DRINKING
WATER, AND 3.6
BILLION PEOPLE ARE
WITHOUT SAFELY
MANAGED SANITATION”**

In the future, we will continue to support the Ministry of Water and Environment to operationalize the 2020 National Operation and Maintenance Framework in Bundibugyo and Ntoroko Districts. We will also facilitate coordination and consultative engagements between the Central Government and Ntoroko and Bundibugyo District Local Governments on WASH services for all.

Stories of Impact

Through our WASH coordination meetings, we are strengthening the capacity of local governments to coordinate WASH sector partners. Community engagement

between right holders and duty bearers has initiated vital conversations on water tariffs, user fees, and quality of WASH services. Furthermore, local musicians and drama groups are creating songs and dramas on WASH as human rights and community feedback and

accountability mechanisms.

Together, we are making a difference and ensuring that access to clean water and sanitation becomes a reality for all. Let us continue to make rights real!

A4W

In School Programme

Introducing the A4W in Schools Program

At Viva con Agua Uganda, we have launched the A4W in Schools Program for the period 2023 – 2025. This comprehensive initiative is our response to the pressing need for improved access to Water, Sanitation, and Hygiene (WASH) services in schools within the KCCA and Wakiso District.

Our approach is community-wide, focusing on sensitizing target schools, fostering connections, and building joint responsibility. We believe that by working together, we can ensure sustained access to WASH facilities for our students.

To enhance the relevance and effectiveness of the A4W in Schools program, we conducted

a Learning Needs Assessment for our staff. The insights gained from this assessment led us to organize a training workshop with a thematic focus on Monitoring and Evaluation. This training was designed to equip our staff with the necessary knowledge, skills, and practical experience in Monitoring and Evaluation, enabling them to deliver impactful results for our beneficiaries and communities.

We also place a strong emphasis on the development and implementation of knowledge management. This allows us to assess the impact of our program and scale up our results to other areas, thereby enabling more schools to have access to water.

Our program has already achieved several key deliverables, including the

development of content and training methodology, engagement in training platforms, delivery and facilitation of interactive training, daily training assessments, post-training evaluation, and the preparation of a final training report.

At Viva con Agua Uganda, we are committed to improving WASH facilities in schools and fostering a healthier and more conducive learning environment for students. We believe that the A4W in Schools Program is a significant step towards achieving this goal.

Regards,
VcA Uganda Team
